Profile

Flutter Developer with hands-on experience building mobile applications, real-time systems, and dashboards using Flutter, Firebase, and modern state-management patterns. Developed 15+ personal and freelance projects ranging from eCommerce apps to ride-hailing and POS systems. Focused on writing clean code, scalable app structure, and consistent UI/UX.

Education

Mansoura University, B.Sc. in Software Engineering — GPA 3.1

Sep 2020 – Jul 2024

Skills

Technical Skills

- **Mobile Development:** Flutter, Dart, Android Studio, Google Maps SDK.
- **State Management:** BLoC/Cubit, Provider, MVVM Architecture.
- **Backend & Cloud:** Firebase (Firestore, Cloud Functions, Auth), Supabase, PostgreSQL.
- **APIs & Payments:** RESTful APIs (Dio, Postman), Stripe, Stripe Connect, Paymob.
- **Networking & Security:** TCP/IP, OSI Model, Routing & Switching, Network Security Basics.

Methodologies & Tools

- **Version Control:** Git, GitHub, GitLab (GitFlow workflow).
- **Software Design:** OOP, Clean Architecture, SOLID Principles.
- **Process:** Agile/Scrum, Technical Documentation, Unit Testing Basics.
- **Data Persistence:** Hive, Sqflite, Shared Preferences.

Top Projects

Spotify — Music App [🐙 GitHub](#)

Dec 2025 – Present

- Developed a high-performance music streaming app featuring real-time synchronized lyrics that highlight and auto-scroll in sync with the audio timestamp.
- Engineered a custom stream-based logic to match just_audio positions with lyric timestamps for a seamless, interactive playback experience.
- Integrated Supabase Auth & PostgreSQL for user data and relational media management.
- Implemented BLoC pattern to maintain a 60 FPS UI while handling heavy audio and text synchronization.

ShipLink — Full-Stack Ride-Hailing Platform (Graduation project) [🐙 GitHub](#)

Jul 2025 – Sep 2025

- Developed a multi-app ecosystem (Customer, Driver, Admin) inspired by core ride-hailing flows.
- Cross-Platform UI: – Applied MVVM with BLoC to maintain a clean separation of UI and logic across 30+ screens.
- API Networking: Implemented the Dio package to handle complex REST API interactions, including custom interceptors for automated token refreshing and error handling.
- Specialized Flutter Skills: Implemented real-time driver tracking using Firebase streams and geolocation queries.
- Data Persistence: Integrated local storage (Hive) solutions to cache shipment history, allowing for smooth offline viewing and faster app launch times.

Sneakers eCommerce App [🐙 GitHub](#)

Feb 2025 – Jul 2025

- Developed a modern online footwear shopping experience with a responsive interface.
- Optimized app state and data flow using *Provider* for scalable cart logic alongside *Firebase* for secure user authentication and real-time database integration.

- **Implemented a modular MVVM architecture allowing for easy feature expansion and maintenance**, ensuring a clean separation of concerns between business logic, data models, and the UI layer for easier maintenance and testing.

Mini-Shop  [GitHub](#)

Apr 2024 – May 2024

- **Created product listing, filtering, cart logic, and user session management.**
- **Used Provider for state management and persistent local storage.**

Certificates

Consulting of Computer and information Center (CCIC)

- 1-Month Mobile Application Development with Flutter Training 

Information Technology Institute (ITI)

- 1-Month Python **Django** Development Training
